

Double Dumps

Product Specifications:

- Unique double cone design
- Solid state timing and pneumatic solenoids control actuator
- Compact design with low headroom
- Spring load design uses 50% less compressed air for operation

Equipment Features:

- Internal actuator out of material path
- No moving external shafts, eliminating wear points and seal maintenance
- 6", 8", 10", and 12" standard sizes
- Used in pressure systems up to 175 psi
- Used in vacuum systems up to -28" mercury
- High temperature to 800° F

Options:

- Carbon steel AR plate and stainless steel construction available
