

Pull-Thru Classifier

Equipment Features:

- New simple compact design cleans, screens, and performs magnetic separation of abrasives in one pass
- Works with any vacuum, diesel or electric
- Vibrating screen and optional Magnet Drum can operate off compressed air or DC electric from vacuum
- Three stage air wash for optimal dust/fines removal
- Easy lift with forklift or crane
- Grit transporter option to transfer recycle grit into storage hoppers or blast pots

Product Specifications:

- Stackable and portable classifier for easy maintenance and operation
- Processes grit/shot and non-magnetic abrasives (garnet, aluminum oxide)
- Dimensions with half-platform 6'3" L x 5'7" W x 10' H and weighs approximately 3500 lbs (with magnet)

Options:

- Half or full access platform design
- Compressed air, 12vdc or 24vdc vibrator options
- Double Dump discharge valve optional to load into sacks or dumpsters
- Optional ADI Patented Screenveyor
